

## COMUNICAÇÃO

- EDITAL UFRJ/COPPE/PET nº 1524/2023-

Rio de Janeiro, 01 de fevereiro de 2024.

Segue abaixo a questões e o gabarito oficial da prova de inglês:

### Questões

1. According to the text, what are the technological drivers mentioned that are redefining the business of getting around?
  - a. Weather, terrain, and fuel efficiency
  - b. Automation, connectivity, and low-carbon technologies**
  - c. Speed, comfort, and accessibility
  - d. Pricing, regulations, and safety measures
2. According to the text, what is the focus of the “THE FUTURE OF ROAD TRANSPORT” report?
  - a. Global economic trends
  - b. European Commission's budget analysis
  - c. Developments in road transport**
  - d. Technological advancements in healthcare
3. How may flexible options like electric bikes, scooters, and modular automated shuttles make public transport more accessible?
  - a. By increasing the size of public transport vehicles
  - b. By reducing the frequency of public transport services
  - c. By shrinking the 'last mile' to and from homes or workplaces**
  - d. By introducing more stringent regulations on public transport

4. What is the potential downside mentioned in the text regarding new mobility solutions like car sharing, ride-sharing, and ride-hailing services?

**a. Increased road congestion**

b. Higher public transport ridership

c. Improved safety records

d. Decreased appeal of cars

5. According to the text, why is it important for policymakers to act and ensure that new technologies make future transport cleaner and more equitable?

a. To maintain the status quo

b. To encourage unregulated competition

**c. To address challenges and burdens on society**

d. To prioritize the interests of disruptive technology companies

6. According to the text, how can innovation in the transport sector slash costs and stimulating demand?

a. By increasing regulations

b. By reducing automation

**c. By cutting out drivers and simplifying production**

d. By limiting sharing options

7. Why does the text suggest that early evidence shows transport efficiency may not be necessarily improving?

a. Due to increased public transport ridership

**b. The lack of integration of flexible options into public transport**

c. Unprecedented advancements in pedestrian-friendly infrastructure

d. Improved safety records

8. What does the text mention as a potential consequence if the introduction of automated vehicles makes car-based transport cheaper and more comfortable?

a. Decreased road congestion

b. Improved public transport ridership

**c. Further deterioration of road congestion**

d. Increased appeal of public transport

9. According to the text, why is it crucial for policymakers to establish a predictable long-term framework, including standardization, data governance, interoperability, and digital security?

**a. To avoid suboptimal investments and unbalanced capacity provision**

b. To encourage uncoordinated competition among service providers

c. To create a glut of options in one place

d. To prioritize the interests of disruptive technology companies

10. Why does the text emphasize the need for policymakers to engage citizens in shaping future transport and mobility?

a. To increase competition among service providers

b. To make decisions without considering public opinions

**c. To assess visions and needs and avoid negative effects on society**

d. To prioritize the interests of disruptive technology companies

## Gabarito

1. b. Automation, connectivity, and low-carbon technologies

2. c. Developments in road transport

3. c. By shrinking the 'last mile' to and from homes or workplaces

4. a. Increased road congestion

5. c. To address challenges and burdens on society

6. c. By cutting out drivers and simplifying production

7. b. The lack of integration of flexible options into public transport

8. c. Further deterioration of road congestion

9. a. To avoid suboptimal investments and unbalanced capacity provision

10. c. To assess visions and needs and avoid negative effects on society
